

PDF Prep Tool Suite

The PDF Prep Tool Suite is a programming library for creating, splitting and merging PDF documents. It can be used to add content such as text, images and vector graphics. Interactive elements such as links, form fields and bookmarks can be added and processed.

The component is used for assembling PDF documents, personalizing documents and filling in form fields. PDF documents can be created from scratch – for instance on the basis of a template to which data is added from a source such as a database. Properties such as position, font, size and color are freely selectable. Once created, PDF documents can be encrypted and optimized for fast web-based viewing.

Properties and Benefits

PDF Prep Tool Suite is particularly suitable for personalization tasks. It allows the use of templates such as business cards, e-books, invoices, etc. Templates are then supplemented with customer-specific information. The tool enables the creation of customized PDF documents for use in sales or for further processing.

Areas of Use

Personalization

PDF documents are used for distributing e-books as well as for creating invoices, contracts and terms and conditions, for instance in insurance application forms. These documents share a common

requirement: they need to be supplemented with data specific to the recipient.

Automated Reporting

Large quantities of information are stored in databases and DMS systems. PDF Prep Tool Suite is designed to receive this information and convert it into distributable standardized PDF documents. It therefore enables the distribution of documents across infrastructures where different technologies and operating systems are in use.

Product Variants

Customer Opinion

PDF Tools AG offers not only powerful, stable and reliable products but also competent advice. They took our requirements with regard to improvements and new functions very seriously. The company is an outstanding partner in the field of information technology.

Bill Brice, CEO,
AlphaTrust Corporation

We can offer our customers an efficient and robust solution for watermark application thanks to PDF Prep Tool Suite. PDF Tools AG assisted our company by providing outstanding customer service and competent support.

John McGinnis,
Marketing Manager,
McLaren Software Ltd

We are very satisfied with the functionality and reliability of products from PDF Tools AG. They understood and implemented our requirements, and they also offer an excellent support service for our development and support teams.

Allen Wyke,
Director Report2Web
Development,
Redwood Software Inc.

Technische Daten

Formats

Input Formats

- PDF

Output Formats

- PDF

Platforms

Operating Systems

- Windows 2000, XP, Vista, 7
- Windows Server 2003, 2008, 2008 R2 – 32 and 64 Bit
- HP-UX – 32 Bit and Itanium
- IBM AIX – 32 and 64 Bit
- Linux (SuSE and Red Hat on Intel)
- Mac OS X
- Sun Solaris

Interfaces and Languages

Interfaces

- API (C, Java, COM)

Variants and Options

Product variants

- API (programming interface)

Performance Characteristics

- Simple application with a suitable mix of functions for post-processing purposes
- High performance
- Platform independent

Functions

- Merge any number of pages from one or multiple PDF documents
- Apply content to the background or foreground of an existing or new page
 - Text (page number, address, customer number, etc.)
 - Image (company logo, scanned signature)
 - Vector graphic (line, square, curve)
- Extract text including font and positioning information
- Add, fill in, delete and read out form fields
- Add internal and external links and comments
- Copy content from multiple pages to one page including positioning, scaling and rotation
- Set and get outlines (bookmarks) in PDF documents
- Define and extract document properties such as title, author, date of creation, etc.
- Read encrypted PDF documents
- Encrypt PDF documents with a password and set permission flags
- Optimize PDF files for fast web view (linearization)
- Set color as RGB or CMYK
- Set page size (media box) and visible area (crop box)
- Remove viewer access rights
