

## **3-Heights™ Products available for 64-bit Windows Platforms**

**November 22, 2006 (Winkel, Switzerland) - PDF Tools AG announces the upgrade of the 3-Heights™ product family to include 64-bit versions for Windows XP and Windows Server 2003 64-bit platforms. "This enhancement enables our high quality, high volume and high performance PDF programming tools to take full advantage of the newest hardware architectures" reports Dr. Hans Bärffuss, President and CEO of PDF Tools AG. "It brings improved performance, increased file size capability, and further solidifies our position as a leader in the PDF programming sector."**

### **Benefits of 64-bit**

As computing tasks have increased in complexity and volume, many common server workloads are straining the limits of the 32-bit x86 architecture. 64-bit platforms offer a single platform for running new 64-bit applications, while continuing to run existing 32-bit applications at high performance. On a 32-bit platform, file size and processing volume are limited. 64-bit applications take advantage of the increased capabilities to overcome these 32-bit restrictions.

### **PDF Tools leads the way**

PDF Tools AG is a pioneer in providing 64-bit support for all of our products, allowing users to profit from the benefits of these new platforms. For example, the 3-Heights™ PDF Producer is one of the first creators worldwide running on 64-bit platforms. This means an even higher volume when creating PDF and PDF/A documents. The 3-Heights™ PDF Optimization Tool is another product benefiting from the 64-bit architecture, optimizing extremely large PDF files in incredibly little time.

All of the 3-Heights™ products come with a 30-day free evaluation version. The download of the 64-bit versions can be done today directly from the website: [www.pdf-tools.com](http://www.pdf-tools.com).

Once more, PDF Tools AG leads the way in implementing the newest technology to offer customers the highest quality, the highest volume and the highest performance for PDF programming tools.

### **About PDF Tools AG**

PDF Tools AG ([www.pdf-tools.com](http://www.pdf-tools.com)) is a world leader in PDF (Portable Document Format) programming technology, delivering reliable PDF products to international customers in all market segments.

PDF Tools AG provides server-based software products designed specifically for developers, integrators, consultants, customizing specialists and IT-departments. Thousands of companies worldwide use the products directly and hundreds of thousands of users benefit from the technology indirectly via a global network of OEM partners. The tools can be easily embedded into application programs and are available for a multitude of operating system platforms.
