Happy New Year from PDF Tools AG!

We at PDF Tools AG hope you had a relaxing holiday season and a great start to the New Year!

Keeping with tradition is important to us. That is why we have written a "[New Year's Resolution](#)" of products and features that we promise to present to you early in 2005. Included on our list are the following highlights:

- The [3-Heights™ PDF Viewer Pro](#) will also display BMP, GIF, PBM, PNG and JPEG2000 in addition to the already supported PDF, TIFF and JPEG formats. It's more than just a PDF Viewer, it's also a highly reliable and robust Image Viewer!

- The [3-Heights™ PDF Viewer and Viewer Pro](#) will soon support transparency, anti-aliasing for graphics and continuous mode view. Support for Windows 98 is also almost completed.

- A new **3-Heights™ Image to PDF Converter** has been created which will replace the current "Classic" Image to PDF Converter. The new converter supports a wider range of image formats and offers **improved performance**, especially when converting JPEG to PDF. It will be available shortly on our web site, as soon as it is fully tested and documented.

- We are working on a **Desktop** and a **Client Run-Time** Version of the [3-Heights™ PDF Repair Tool](#). These versions will not be quite as powerful as the current Server Run-Time Version, but will be less expensive and will focus on the single-user market.

A **3-Heights™ PDF Optimization Tool** is also in the works which will optimize images, remove redundant and obsolete objects, and remove and replace embedded fonts in a PDF document, improving PDF files for high quality printing and fast web viewing.

All of these goals and more are planned to be completed during the winter season, which means we will be extremely busy over the next several weeks to achieve our deadlines and to ensure that the new products meet the high quality standards that you expect from us.

If you have any questions about these new products and features, please contact Roland in the sales department (pdfsales@pdf-tools.com) who will be happy to provide you with more information.
