3-Heights™ PDF Producer is released!!

3-Heights™ PDF Producer

July 13, 2006 - PDF Tool AG is excited to announce the release of its newest tool, the 3-Heights™ PDF Producer. This unique PDF creator is more than just a printer driver that generates PDF documents extremely quickly and synchronously from virtually any Windows application. It can create PDF in parallel and offers client- and server-side PDF creation, an API for integrating into applications, and the option of creating 100% PDF/A compliant documents.

The main advantage of the mutual communication between the elements is that your Windows application knows exactly when the PDF document is generated. Moreover, the use of a genuine GDI printer driver eliminates the tiresome processing of PostScript files, speeding up the PDF creation immensely.

The main features of new 3-Heights™ PDF Producer include:

- select the PDF compliance level: 1.4, 1.5, PDF/A-1b
- create PDF files on clients or spool to a server
- auto detect and process portrait and landscape pages
- choose from over 100 pre-defined page sizes
- embed and subset fonts
- use any Unicode and ANSI character encoding, including Asian language characters
- determine resolution, print quality of graphic and colour or grey scale
- employ ZIP, CCITT, JBIG2, JPEG and JPEG2000 compressions for images
- install for use on a Windows Terminal Server

The PDF/A option helps guarantee the long-term reproducibility of your PDF files.

The 3-Heights™ PDF Producer is available as a programming component (API), with a COM; interface for VB., .NET, Delphi, C/C++ etc. applications. Runtime Kits in the form of installation kits ease the deployment to clients and multiple-user servers. To purchase or evaluate the 3-Heights™ PDF Producer, please click [here](#).

PDF Tools AG offers a complete family of PDF/A compliant tools

PDF Tools AG offers the most comprehensive selection of PDF/A-compliant tools available. This includes our 3-Heights™ PDF Validator, the 3-Heights™ Image to PDF Converter, the 3-Heights™ Viewer and now the new 3-Heights™ PDF Producer. More products are also on the way.

PDF Tools at the AIIM Expo in Philadelphia, May 16-18, 2006

PDF Tools AG was very visible at the AIIM Expo 2006 held in May in Philadelphia. We had a whole team of representatives manning our stand and meeting with customers who also had stands in the expo hall. Dr. Hans Bärffuss, Prof. Peter Bienert, Stephan Herkert and Roger Reeves had an extremely active 3 days. Interest in our 3-Heights™ PDF programming technology was great, and we were non-stop in discussions from opening until closing every day.

Response was so good that we have already reserved our place for the AIIM Expo 2007 to be held in Boston next April. We hope you are also planning on attending and look forward to seeing you there.

PDF/A Seminars a great success

PDF Tools AG, as a founding member of the PDF/A Center of Competence, organized three ½-day Seminars about PDF/A. Interest is growing rapidly for this new archiving format that has been approved by the International Standards Organization (ISO). The seminars were held in Frankfurt, Hamburg, and Zurich and were a great success. Between 45 and 60 IT, business and archiving professionals visited each of the seminars. Topics included an overview of electronic content management, an introduction to the PDF/A format, implementing PDF/A into an archiving workflow, PDF/A and scanned documents, and legal aspects about electronic document archiving.

More seminars are planned for the fall, and don't be surprised if you also find us speaking at an event in the US or Canada. The course material can also be tailored if you are interested in a specific company presentation. If you have any questions about PDF/A seminars, you can send a mail to our [PDF/A Competence Center](#).

Visit us at the ECM West Exposition

PDF Tools AG is participating in the ECM West Exposition being held in San José CA from November 6 to 8. Dr. Hans Bärffuss and Roger Reeves will be manning our stand and greeting our customers all three days at **Booth #112**.

Please click on the following link to send a mail and arrange for an appointment. We look forward to greeting as many of you as possible!
